

# REMOVE BARRIERS TO INVESTIGATION

## STREAMLINE CASE MANAGEMENT & CLOSURE

**If you're like most agency leaders,** you know your agency's management of data can be better. According to a recent survey of ours, 86% of surveyed agencies acknowledged that managing their data is an area they need to improve upon.<sup>1</sup> By doing so, information would be more accessible to detectives working cases and ultimately easier to share with judicial partners for prosecution, all more securely with chain of custody intact.

### NEW PROBLEMS WITH MORE DATA

More and new types of data are exploding in public safety, just as they are in other facets of our lives. This exponential growth in the number and types of structured data, such as reports, and unstructured data, such as digital videos and photos, is intensifying the challenge of managing and using it effectively.

For your investigators, gathering information and being able to quickly understand it is becoming more of a challenge and more time-consuming. Today, digital evidence from body-worn video, in-car video, fixed surveillance, ALPR, 9-1-1 systems, sensors, and new sources such as public tips are adding time and complexity to ongoing investigations. This volume of information creates overloads for records staff trying to gather it and puts your detectives risk of missing key information or not getting information when and where they need it which can put the entire case at risk.

### SEAMLESS COLLABORATION IS KEY

When it comes to prosecution, your judicial partners need real-time access to case data. This often means struggling to organize information in a variety of formats or printing documents, burning physical disks, and manually delivering files, all of which is time consuming, incurs costs and risks misplacing materials that can complicate prosecution. Securely, digitally accessing case information can deliver the same efficiencies as we've seen with accessing more traditional media, like movies and news. Digital accessibility should now be the expectation and it provides a level of immediacy that isn't otherwise possible.

## ADMISSIBILITY MATTERS MOST

In a highly sensitive information environment, which requires seamless collaboration and communication among detectives, analysts, records staff, officers, and judicial partners, tracking who has accessed what, and ensuring critical evidence can't be leaked is of utmost importance. With more people working a case, a detailed activity log has become necessary to accurately track chain-of-custody. Without the proper tools in place, documenting access to information and movement of evidence can be time-consuming and another overwhelming demand on your limited resources.

## ELIMINATE DATA CHALLENGES FOR FASTER AND MORE EFFECTIVE INVESTIGATIONS

Our public safety software suite can make your investigations move faster and your detectives more effective, so that criminals can be prosecuted as quickly as possible. Improve your case management capabilities with either [PremierOne Records](#), our highly scalable and configurable records management system, ideal for large agencies, or [Spillman Flex Records](#) our powerful records management solution, ideal for smaller agencies preferring ease and simplicity.

Both solutions include the digital evidence management capabilities of [CommandCentral Vault](#), which aggregates, organizes, and manages access to all digital content, helping you easily tie digital evidence to cases and make it immediately available for review and sharing. These systems provide a powerful solution to overcome your data challenges.

Consolidate all case-related information (reports, statements, audio, video, images, tips and more) into a single pane of glass, so your detectives can quickly review it and work their case.

With this comprehensive incident record, easily share details with judicial partners, digitally. Even manage case updates and alerts to prosecutors so they're always up-to-date with the information they need.

Benefit from the peace of mind from detailed security permission structures that control access to sensitive information and maintain airtight audit logs of case work — protecting case integrity.

We know effectively managing case data can be a challenge. Now, you can feel confident there's a solution that's right for your agency. Our records and evidence management solutions empower new levels of productivity for detectives, and the rest of your team, so they can close more cases, faster.
